DETAILED ACTION

Claim Objections

1. Claims 1-17 are objected to because of the following informalities: in claim 1, lines 1 and 2, --a-- should be inserted before "rail"; in claim 3, line 1, --a-- should be inserted before "whole"; in claim 12, lines 1 and 2, --a-- should be inserted before "rail"; and in claim 16, lines 1 and 2, --a-- should be inserted be3fore "recycled" and "rail" respectively. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claims 1-6, 8-10 and 12-15 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's Admitted Prior Art (AAPA).

With regards to claims 1, 3-6, 8, 12 and 13, Applicant, at pages 1, 2 and 5 of the specification to be known as AAPA, discloses a method of recycling a whole rail comprising a lower portion, an upper portion and a web portion, wherein the rail is heated to a plastic state and slit in a plurality of pieces and the plurality of pieces are deformed to a generally uniform shape. Applicant should note that any of the plurality of pieces could be called a first piece or a second piece. Applicant should note that the rail

Application/Control Number: 10/635,948

Art Unit: 3726

of AAPA is considered slit across the web section since it is slit to separate the web from the lower and upper portions.

For claim 2, see paragraphs 24 and 25 of the specification where it is admitted that reduction passes are conventional and are associated with slitting knives.

For claim 9, the lower portion of the rail of AAPA could be called a flange and the upper portion a head.

For claim 10, reduction passes to deform the rail pieces are conventional in the art, see paragraph 24 of the specification.

For claim 14, Applicant should note that pinch rolls are conventional reduction pass components as admitted in paragraph 24 of the specification.

For claim 15, see paragraph 5 of the specification wherein it is disclosed that each piece the rail of AAPA is subjected to rolling operations.

Allowable Subject Matter

- 4. Claims 7 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. Claims 16 and 17 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.

Application/Control Number: 10/635,948 Page 4

Art Unit: 3726

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Essama Omgba whose telephone number is (571) 272-4532. The examiner can normally be reached on M-F (10-7:30) First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on (571) 272-4690. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
